## Repeaters

**KARC** maintains the KH6E repeater system with 4 sites on Kauai at Crater Hill, Kalepa Ridge, Waimea and Kalaheo. The VHF repeaters are connected via UHF radio, not dependent on the Internet to perform as a linked system. These repeaters are located in high places, some of them only accessible with difficulty.

Our Repeater Guys, Ron KH6JI and Jim NH6HI are working on tuning the VHF cavity filters in this pic. Also on the repeater committee is Ron WH6TR, taking photo credit.
